

NEXTCOMPUTING KEY CORPORATE MILESTONES

April 16, 2007 – Industry-leading partners BlueFish444, Brainstorm America, Chyron Corporation, and NewTek showcase application-specific digital video and broadcast solutions at NAB2007

March 22, 2007 – NextDimension family certified for NVIDIA Quadro® FX 4600 by PNY Technologies® graphics board

January 21, 2007 – IT-industry news source *ConnectITnews* features NextDimension in “NextComputing Markets Lightweight Workstation”

January 16, 2007 – NextDimension Evo and NextDimension Evo HD flextop computers announced - expanded NextDimension family unveiled

December 28, 2006 – NextDimension certified for industry-leading 3D platforms Autodesk 3ds max, NewTek LightWave, and Softimage XSI

December 15, 2006 – NextPak massive storage option introduced for NextDimension

November 15, 2006 – *VFXWorld's* Bryan Hoff review NextDimension in “Flexing Mobile Muscles”

November 11, 2006 – NextDimension flextop computers feature innovative portable, clip-on displays - the thinnest, lightest-weight 17” monitors available

October 20, 2006 – NextDimension certified for NVIDIA Quadro® FX 5500 by PNY Technologies® - first portable workstation to incorporate this ultra high-end graphics board

September 8, 2006 – Dual PCI-X 64bit/100MHz slots available on all NextDimension systems

August 31, 2006 – Dual PCI Express x16 slots available in NextDimension and Vigor series

July 27, 2006 – NextDimension flextop computer incorporates fastest 940-based processors from AMD

July 26, 2006 – Autodesk Users Group International (AUGI) featured NextComputing in July news

July 12, 2005 – NextDimension supports HydraGraphics 6-displays configuration

July 6, 2006 – Dual SLI-enabled NVIDIA Quadro® FX3500 graphics cards by PNY Technologies® integrated in NextDimension

June 30, 2006 – *Industrial Embedded Systems* features NextComputing’s NextDimension in “Supercomputing Graphics Go Portable”, discussing the computer industry's only high-performance, high-end graphics portable system

April 18, 2006 – Partnership announced with mission-critical, real-time Linux solutions leader, Concurrent Computer Corporation

November 4, 2005 – World’s first “flextop” portable computer – the NextDimension – unveiled at Society of Exploration Geophysicists (SEG) 2005 Annual Exposition

October 26, 2005 – BAE Systems and NextComputing announce optimized solution for mobile image analysis and exploitation at the GEOINT Symposium 2005

August 5, 2005 – FleXtreme extreme performance architecture introduced

December 14, 2004 – Vigor Ultra-III release – the first 64-bit dual UltraSPARC™III processor mobile workstation with a 3/4 length PCI expansion slot for additional networking, graphics, and I-O support

November 2, 2004 – FlexPC Server released – breakthrough open-standards, mobile workstation/server available in briefcase-sized form-factor

September 8, 2004 – NextBook64 released – a high-performance notebook workstation/server platform available with AMD64 technology

May 21, 2003 – NextBlade released – the first sub \$2,500 UltraSPARC™ 64-bit Solaris™ small footprint desktop-replacement notebook

March 10, 2003 – NextBook released – the first Intel Pentium 4 2.4Ghz notebook with concurrent-use Linux and Windows support

March 5, 2003 – PowerBlade released – the first sub \$4,000 UltraSPARC™ 64-bit Solaris™ notebook and mobile server

December 30, 2002 – NextServer 420 announced – dense-computing 8-blade server featuring PCI expansion slots and high-performance AMD and Intel architecture
